Assess the Security and Compliance of your Cloud Platform

Dear Sir/Madam,

Tech Equity is Google Cloud partner and reseller. We train Google employees, clients and partners around the world, and develop solutions that enable organisations both large and small to cost effectively migrate their applications to the cloud.

Our engineers have delivered over 150 workshops for Google, and developed an Application Modernization Platform based Google Cloud security best practices. This platform accelerates adoption of advanced Google Kubernetes Engine and Cloud SQL based platforms, without the need to develop deep Kubernetes and database skills.

We are able to assess the compliance of your application platform to recommended security best practices, and enable you to select the most appropriate technology stack for your organisation.

Where Google Kubernetes Engine is a good fit, we can implement a secure, highly scalable and cost effective Google Kubernetes Engine based Application Modernization Platform within a week, enabling you and your teams to jump start your modernization program.
