Make the Right Design Decisions

Dear Sir/Madam,

Tech Equity is Google Cloud partner and reseller. We train Google employees, clients and partners around the world, and develop solutions that enable organisations both large and small to cost effectively migrate their applications to the cloud.

We have developed a Cloud Architecture Workshop designed to help you understand the Google Cloud platform and make the right design choices. Our Cloud Architecture workshop is geared towards architects, security, DevOps teams and decision makers involved in deploying solutions in the Google Cloud.

After attending this workshop, you will be able to:

- Articulate and map your business needs to Google Cloud products and features.
- Identify gaps and address each using recommended best practices.
- Align teams and minimise friction in achieving common goals.
